This website can be improved by:

1. Reducing the size and execution time of JavaScript code

2. Fixing the dimensions of images and content

There were issues affecting this run of Lighthouse:

- **A page navigation was detected during the run. Using timespan mode to audit page navigations is not recommended. Use navigation mode to audit page navigations for better third-party attribution and main thread detection.**

▲ Interaction to Next Paint
790 ms

⊞ View Treemap   View Trace

This website can be improved by:

- **Reduce the Total Blocking Time (TBT) from 10,310 { ms}:** This is the primary reason the website is slow and unresponsive to user interactions.

- **Improve the overall Performance Score from 14/24:** This score is poor and requires urgent improvement, especially by addressing the high Interaction to Next Paint (INP) of 790{ ms}.

[ ] View Treemap   View Trace

This website can be improved by:

1. **Reduce the Total Blocking Time (TBT) of 11,480 { ms},** as it is the main cause of the website's unresponsiveness.
2. **Raise the poor overall Performance Score of 9/24** by improving initial loading speed and rendering.
3. **Correct the low Best Practices score of 3/8** as it indicates serious underlying issues in quality and security (such as HTTPS or outdated technologies).
